

Jubb are a successful multi-disciplinary consultancy providing planning and engineering design services to a wide range of clients across the UK. Working across a wide range of sectors including Commercial, Residential, Health, Education and Defence, we pride ourselves on delivering high quality engineering solutions utilising the latest design technologies to ensure that we consistently meet our client's expectations.

With a successful track record spanning over 50 years, the business has a clear vision to continue to develop and grow through the recruitment and retention of high calibre, dynamic and motivated employees who are passionate about their career development, thrive on responsibility and committed to delivering solutions fit for today's modern construction environment.

Our Cardiff team requires a talented Senior/ Principal infrastructure engineer to join our Civil Engineering team. The candidate will ideally have a minimum of 5 - 10 years' experience.

This role represents an excellent opportunity for someone with talent and drive to be part of the existing Cardiff team to grow and lead by example and create a successful and enjoyable work environment.

Jubb

Role: Senior/Principal Civil Engineer

Location: Cardiff

Salary: Competitive

What you'll bring to your new role as Civil Engineer

- You will be working on a large range of projects leading on infrastructure led schemes but also supporting our structural engineering teams in the design of drainage and external works;
- You will have strong knowledge of drainage design, particularly pertaining to building drainage, developing SuDS and SAB approvals as well as highway design capability;
- Experience with industry standard design software including AutoCAD, Civil 3D and Microdrainage;
- Self-motivated and ability to work well as part of a team, offering support to the office principal as well as the ability to work independently as required;
- Effective communication skills to prepare reports and liaise with project team members;
- Experience undertaking flood consequence assessments, working in a D&B environment and developer infrastructure projects would be highly desirable;
- Knowledge of building and CDM regulations is essential, as is experience in managing projects, contracts, budgetary control, specification preparation and liaising with clients.
- Ideally you will be professionally qualified or progressing towards a professional qualification and are looking for a company to support you;
- The role is suitable for individuals who wish to develop to take on additional responsibility as their career progresses, and team leadership will be an option for the right candidate.

What's on offer for you as the new Civil Engineer

- Competitive salary.
- 27 days annual leave plus bank holidays.
- Flexible working hours.
- Holiday Purchase Scheme.
- Employer provided life assurance and income protection schemes
- Access to Company Pension with a generous employer contribution.
- Support towards chartership and training available.
- A friendly modern office environment.
