

About Jubb

Jubb is a multi-disciplinary team of engineers and planning design consultants. We have unparalleled experience across all sectors in the built and natural environments and are a trusted partner to our valued clients and fellow professionals.

We are a Director-owned business offering engineering design and planning services to the public and private sectors. To learn more about us and the type of work we are involved in click [here](#).

Our success comes from investing in our people and technology and utilising the latest digital design tools to find the most appropriate and smart solutions for our clients.

Working with us

The role will focus on supporting our engineering teams from one of our four office locations; Bristol, Cardiff, Plymouth or Winchester.

During your placement you will be provided with the opportunity to take advantage of the multidisciplinary nature of the business, enabling a broad understanding to support your future studies, career and personal professional development.

You will have access to our Learning Pathways programme including a full internal induction programme, allocation of a personal buddy, personal development coaching and mentoring through our quarterly performance review scheme.

What's on offer

You will be presented with opportunities to apply and enhance your technical skills and knowledge by;

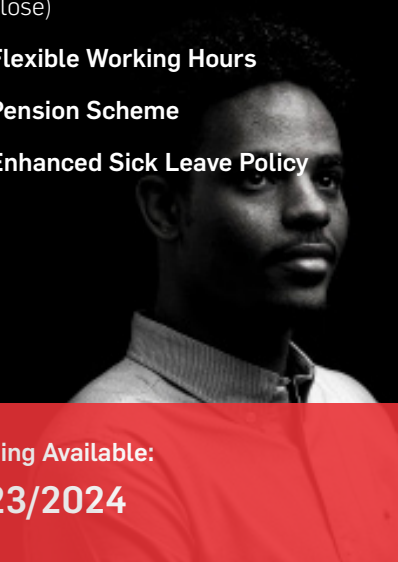

- Assisting the Project Engineer to manage, coordinate and review projects under their responsibility.
- Providing engineering design and draughting functions in multi-disciplinary fields i.e., Building Structures, Highway Structures, Drainage and Roads.
- Undertake and assist in the design of steelwork, concrete, and timber structures to the current regulatory standards.
- Pro-actively support other technical staff and ensure that work produced is of the highest standard.
- Providing aid to ensure projects are delivered within the agreed budgets, communicating any project variations, allowing fee consequences to be assessed.
- Attending site meetings and in-house design meetings.

In addition to developing your technical abilities you will receive professional skills enhancement through;

- Building and maintaining effective professional relationships internally and with clients, planning consultants, architects, project management and services engineers.
- Learning what it means to be commercially aware, working to internal and client expectations and working within agreed time frames.
- Producing designs and engineering solutions of good quality, complying with current design and construction standards and applicable legislation.
- Developing beneficial self-awareness skills including making the most of your strengths.
- Supporting colleagues to deliver a first-class service, meeting legal guidelines and health & safety requirements.

Other Benefits include:

- **Salary:**
£18,750 p.a.
- **Annual Leave:**
26 days plus 1 Birthday Day (4 days reserved for compulsory Christmas close)
- **Flexible Working Hours**
- **Pension Scheme**
- **Enhanced Sick Leave Policy**

Opening Available:
